A photograph of an American football player in a white jersey and silver helmet running with the ball. The scene is set at night under bright stadium lights. The player is in motion, leaning forward, and holding the football with both hands. The background is dark with bright, circular light patterns from the stadium lights.

INFLATING INSTRUCTIONS

Step 1

Straighten the ball out as best as possible.

Step 2

Shake the ball so that the bladder is hanging loosely and vertically beneath the valve hole.

Step 3

Allow 1-2 drops of valve oil to drip into the valve hole. Remember to oil the ball regularly so that the valve doesn't dry out.

Step 4

Pump the ball up with a pump. It is important that the bladder is in the vertical position as shown here. Always remember to use the nipple.

Step 5

Use a pressure gauge to check if the ball has the recommended pressure (see the recommendation on the wall)

Step 6

Clean the ball with a brush and tepid water. Dry the ball with a cloth. Place the ball in a ventilated room with a temperature of 15 °C-30 °C.
