Cast Iron handle

Suitable for oven use

Uncoated Blue Carbon steel pan.  
Pre-seasoned; Ready with performance.  
Use without chemical coating concern.  
More use better.

## New Pan

## Start use

Acquired appearance change, "Patina" develops when fat comes into contact with carbon steel surface, the fat penetrates the material and in doing so, transform it from dull and fry surface into a slick and supple one.

## More and more use

Multi Patinas make whole pan into a Brown and Black marble appearance, whole pan into a slick and supple stage. It becomes a virtually Nonstick pan. Uncoated Blue Carbon steel pan Pre-seasoned; Ready with performance.

## RHINO SKIN PHYSICAL CONSTRUCTION NONSTICK

The secret for better nonstick is from the special Rhino skin structure. Known as famous Leidenfrost Effect- When the steel surface hot enough, drop of liquid help up by the layer of vapor created by hot pans, which make food detaching from the pan. Pre-seasoned, vapor held up, together with the Rhino skin pattern- its special Peak and Valley structure, your food stands on the top of the peaked design whilst the oil / fats run through the ridges. And more, the hammer pattern provides an ideal nesting place for the cooking oil to reside in, offering healthier cooking with less oil.

# Dolemen.

Wood Handle

The handles made by natural wood.

Uncoated Grey Carbon steel .  
Use without chemical coating concern .  
More use better .

**New Pan**

**Start use**

Acquired appearance change, “Patina” develops when fat comes into contact with carbon steel surface, the fat penetrates the material and in doing so, transform it from dull and fry surface into a slick and supple one.

**More and more use**

Multi Patinas make whole pan into a Brown and Black marble appearance, whole pan into a slick and supple stage. It becomes a virtually Nonstick pan. Uncoated Blue Carbon steel pan Pre-seasoned; Ready with performance.

**Fry Pan**
